

OneBusAway

The open source platform for real-time transit information

Provide real-time vehicle locations, alerts, and arrival information to riders, with iOS and Android apps, a web platform, SMS, and developer-friendly APIs.

“They have always put accessible information front and center.”

Devin Braun, MTS

ABOUT US

OneBusAway is a project of the Open Transit Software Foundation, a 501(c)(3) nonprofit. OneBusAway launched its first service in 2008, and is now used by agencies in the U.S., Poland, and Argentina.

YOUR EQUIPMENT

Use your existing CAD/AVL system if you have one, or integrate with simple GPS feeds that don't require expensive hardware.

YOUR DATA

Your data belongs to you. We will never collect personally identifying information or sell your passenger data.

YOUR CHOICE

No vendor lock-in. Use only the features you need. Complete freedom to white-label and customize. It's all yours.
